

Welcome from the Director

It is with the greatest pleasure that I welcome you to the *2022-2023 edition of the Xenion High School magazine, Ithaki*.

In Greek literature, Ithaki represents the culmination of life's journey by discovering the way to the place where one truly belongs. Our aim as a school is to provide our students with the skills and qualities they will need to set off on their life's journey, in search of their own 'Ithaki'.

This publication is a gazette; it is a journal of the incredible work carried out by students and teachers alike during the academic year. It is a testament to our students' academic endeavours and initiatives, but also to the many different ways in which they are encouraged to develop other invaluable qualities such as creativity, respect, kindness and empathy – qualities they will take with them beyond their school years.

The pages of this magazine demonstrate our fundamental belief that education does not begin and end in the classroom, but that it encompasses every aspect of human experience. It is for this reason that we aim to give our students as many opportunities to 'learn' both in and outside of the classroom.

I would like to thank and congratulate everyone who has worked to make this possible. I congratulate our teachers for their dedication and commitment to providing the best possible education to our students. I congratulate our support staff for facilitating and ensuring the smooth day-to-day running of the school. ***But most of all, I congratulate our students. They are the people that breathe life into our school. They are the ones who make all our efforts worthwhile. It is our students that Ithaki applauds and celebrates.***

National & International Participation

Xenion High School has always encouraged students to be active on the international stage, as benefits young people who wish to take their place in the wider world. As a result, our school, our town and our country are well represented in many international settings by Xenion students – both in teams of delegates and as individuals. The value of the life-skills such as problem-solving, negotiating and planning that are learned from such experiences cannot be overestimated and the understanding, tolerance and insight that students gain from international experiences are vital qualities in those who will lead our country in the future.

Political bodies such as the European Youth Parliament foster an understanding of the relationship between state and citizenry and an appreciation of the complexities of government. Through numerous initiatives, students work with their peers from other countries in the building and promotion of friendship and co-operation and the mitigation of prejudice and insularity.

Medi.M.U.N. offers a unique experience to young people as they meet and debate issues of real importance in today's world. Young Cypriots are asked to represent the interests of countries and communities other than Cyprus. The insights they gain into how the wider world has different needs and priorities from their own, together with the confidence in their ability to put forward a point of view in a cogent and articulate manner that they develop as a result of their participation, are assets that will serve them well in their future studies and careers.

Students from our school participated in a preparation workshop for the Medi.M.U.N. Conference.
